

## The Perfect Co-Driver

The skeye.pad automotive is the perfect co-driver for logistics, transport and field service applications. It has been particularly designed for use in vehicles to support the driver, disposition and entire fleet management.

With its large display, powerful processor and available interfaces, the skeye.pad automotive enables a variety of functions: Two RS232 and one USB master interface allow for the connection of different peripheral devices. The optional video input supports the use of a rear view camera. And due to the

various functions of the skeye.pad automotive less devices per truck are required. This decreases the running costs and at the same time increases the fleet's security and efficiency. Windows CE .NET 4.2 or Windows CE 5.0 are the powerful base for order management and navigation software.

Strong partners like Map & Guide or Navigon provide for a professional navigation software supporting a combination of navigation and order management. This spares the driver the trouble of searching and entering of addresses.

SPECIFICATIONS

<b>Hardware</b>	Marvell PXA255 400 MHz Silicon Motion graphics accelerator 128 MB SD-RAM, 128 MB up to 1 GB Flash 8,4" (21 cm) transmissive, brilliant TFT display 600 x 800 pixels, 65.536 colours Touch screen Optional video input for rear view camera Mounting plate for secure installation Input voltage 10-16 V including voltage transformer, suitable for all on-board power supplies Size approx. 240 x 160 x 30 mm
<b>Connectors and ports</b>	2 x RS232, 1 x USB Host, 1 x USB Slave Integrated Wireless LAN module 802.11g (optional) with external antenna connection Integrated GPRS-/UMTS-module (optional) with external antenna connection PCMCIA Type II Slot CF Type II Slot
<b>Software</b>	Windows CE .NET 4.2 or Windows CE 5.0 Flash disk (FAT32) for permanent file or settings, backup Backup tool SysBackup: backs up data, settings and databases
